## Financial Data Supplement Q1 2024

April 25, 2024

## Q1 2024 Financial Data Supplement

Due to rounding, numbers presented throughout this document may not sum precisely to the totals we provide and percentages may not precisely reflect the absolute figures.

All segment figures reflect the segment composition as of the first quarter 2024.

## EU carve-out

Results are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board ("IASB") and endorsed by the European Union ("EU"), including application of portfolio fair value hedge accounting for non-maturing deposits and fixed rate mortgages with pre-payment options (the "EU carve-out"). Fair value hedge accounting under the EU carve-out is employed to minimize the accounting exposure to both positive and negative moves in interest rates in each tenor bucket thereby reducing the volatility of reported revenue from Treasury activities.

For the three-month period ended March 31, 2024, application of the EU carve-out had a positive impact of $€ 403$ million on profit before taxes and of $€ 287$ million on profit. For the same time period in 2023, the application of the EU carve-out had a negative impact of $€$ 97 million on profit before taxes and of $€ 70$ million on profit. The Group's regulatory capita and ratios thereof are also reported on the basis of the EU carve-out version of IAS 39. As of March 31, 2024, the application of the EU carve-out had a negative impact on the CET1 capital ratio of about 33 basis points compared to a positive impact of about 2 basis points as of March 31, 2023. In any given period, the net effect of the EU carve-out can be positive or negative, depending on the fair market value changes in the positions being hedged and the hedging instruments.
To reflect reporting obligations in Germany and the U.S., Deutsche Bank has prepared separate sets of interim financial information (i.e. locally: based on IFRS as endorsed by the EU; U.S.: based on IFRS as issued by the IASB).
This Financial Data Supplement is presented under IFRS as endorsed by the EU. Deutsche Bank is filing its Interim and Annual Reports under IFRS as adopted by the IASB with the U.S. SEC (https://www.db.com/ir/en/sec-filings-for-financial-results.htm).

## Definition of certain financial measures and other information (1/3)

## Non-GAAP financial measures

This document and other documents the Group has published or may publish contain non-GAAP financial measures. Non-GAAP financial measures are measures of the Group's historical or future performance, financial position or cash flows that contain adjustments that exclude or include amounts that are included or excluded, as the case may be, from the most directly comparable measure calculated and presented in accordance with IFRS in the Group's financial statements.

## Return on equity ratios

The Group reports a post-tax return on average shareholders' equity (RoE) and a post-tax return on average tangible shareholders' equity (RoTE), each of which is a non-GAAP financial measure.
The post-tax RoE and RoTE are calculated as profit (loss) attributable to Deutsche Bank shareholders after Additional Tier 1 (AT1) coupon as a percentage of average shareholders' equity and average tangible shareholders equity, respectively.
Profit (loss) attributable to Deutsche Bank shareholders after AT1 coupon for the segments is a non-GAAP financial measure and is defined as profit (loss) excluding post-tax profit (loss) attributable to noncontrolling interests and after AT1 coupon, which are allocated to segments based on their allocated average tangible shareholders' equity.
For the Group, it reflects the reported effective tax rate which was $29 \%$ for Q1 2024, 14\% for FY 2023, (105)\% for Q4 2023, 30\% for Q3 2023, 33\% for Q2 2023, 29\% for Q1 2023 and (1)\% for FY 2022.

For the segments, the applied tax rate was $28 \%$ for Q1 2024, for all quarters in 2023, FY 2023 and for FY 2022.

At the Group level, tangible shareholders' equity is shareholders' equity as reported in the consolidated balance sheet excluding goodwill and other intangible assets. Tangible shareholders' equity for the segments is calculated by deducting goodwill and other intangible assets from shareholders' equity as allocated to the segments. Shareholders' equity and tangible shareholders' equity are presented on an average basis.
The Group believes that a presentation of average tangible shareholders' equity makes comparisons to its competitors easier and refers to this measure in the return on equity ratios presented by the Group. However, average tangible shareholders' equity is not a measure provided for in IFRS, and the Group's ratios based on this measure should not be compared to other companies' ratios without considering differences in the calculations.

## Definition of certain financial measures and other information (2/3)

## Allocation of average shareholders' equity

Shareholders' equity is fully allocated to the Group's segments based on the regulatory capital demand of each segment. Regulatory capital demand reflects the combined contribution of each segment to the Groups' Common Equity Tier 1 (CET1) ratio, the Groups' leverage ratio and the Group's capital loss under stress.

Contributions in each of the three dimensions are weighted to reflect their relative importance and level of constraint for the Group.
Contributions to the CET1 ratio and the leverage ratio are measured through risk-weighted assets (RWA) and leverage ratio exposure. The Group's capital loss under stress is a measure of the Group's overall economic risk exposure under a defined stress scenario.

Goodwill and other intangible assets are directly attributed to the Group's segments in order to allow the determination of allocated tangible shareholders' equity and the respective returns.
Shareholders' equity and tangible shareholders' equity is allocated on a monthly basis and averaged across quarters and for the full year.

## Adjusted costs/nonoperating costs

Adjusted costs is one of the Group's key performance indicators and is a nonGAAP financial measure for which the most directly comparable IFRS financial measure is noninterest expenses. Adjusted costs is calculated by deducting (i) impairment of goodwill and other intangible assets, (ii) net litigation charges and (iii) restructuring and severance, in total referred to as nonoperating costs, from noninterest expenses under IFRS. The Group believes that a presentation of noninterest expenses excluding the impact of these items provides a more meaningful depiction of the costs associated with the operating businesses.

## Revenues excluding specific items

Revenues excluding specific items is a performance indicator that is a nonGAAP financial measure most directly comparable to the IFRS financial measure net revenues. Revenues excluding specific items is calculated by adjusting net revenues under IFRS for specific revenue items which generally fall outside the usual nature or scope of the business and are likely to distort an accurate assessment of the divisional operating performance. Excluded items are debt valuation adjustment (DVA) and material transactions or events that are either one-off in nature or belong to a portfolio of connected transactions or events where the P\&L impact is limited to a specific period of time. The Group believes that a presentation of net revenues excluding the impact of these items provides a more meaningful depiction of the revenues associated with the bank's business.

## Net assets (adjusted)

Net assets (adjusted) are defined as IFRS total assets adjusted to reflect the recognition of legal netting agreements, offsetting of cash collateral received and paid and offsetting pending settlements balances. The Group believes that a presentation of net assets (adjusted) makes comparisons to its competitors easier.

## Definition of certain financial measures and other information (3/3)

## Book value and tangible book value per basic share outstanding

Book value per basic share outstanding and tangible book value per basic share outstanding are non-GAAP financial measures that are used and relied upon by investors and industry analysts as capital adequacy metrics. Book value per basic share outstanding represents the bank's total shareholders' equity divided by the number of basic shares outstanding at period-end. Tangible book value represents the bank's total shareholders' equity less goodwill and other intangible assets. Tangible book value per basic share outstanding is computed by dividing tangible book value by period-end basic shares outstanding.

## Cost ratios

Cost/income ratio: Noninterest expenses as a percentage of total net revenues, which are defined as net interest income before provision for credit losses plus noninterest income.

Compensation ratio: Compensation and benefits as a percentage of total net revenues, which are defined as net interest income before provision for credit losses plus noninterest income.

Noncompensation ratio: Noncompensation noninterest expenses, which are defined as total noninterest expenses less compensation and benefits, as a percentage of total net revenues, which are defined as net interest income before provision for credit losses plus noninterest income.

## Other key ratios

Diluted earnings per share: Profit (loss) attributable to Deutsche Bank shareholders, which is defined as profit (loss) excluding noncontrolling interests, divided by the weighted-average number of diluted shares outstanding. Diluted earnings per share assume the conversion into common shares of outstanding securities or other contracts to issue common stock, such as share options, convertible debt, unvested deferred share awards and forward contracts.
Book value per basic share outstanding: Book value per basic share outstanding is defined as shareholders' equity divided by the number of basic shares outstanding (both at period-end).
Tangible book value per basic share outstanding: Tangible book value per basic share outstanding is defined as shareholders' equity less goodwill and other intangible assets, divided by the number of basic shares outstanding (both at period-end).
Tier 1 capital ratio: Tier 1 capital, as a percentage of the RWA for credit, market and operational risk.

Common Equity Tier 1 capital ratio: Common Equity Tier 1 capital, as a percentage of the RWA for credit, market and operational risk.

Phase-in CRR/CRD leverage ratio: Tier 1 capital (CRR/CRD phase-in), as a percentage of the CRR/CRD leverage ratio exposure measure.
Net interest margin: For Group and divisions, net interest income (before provision for credit losses) as a percentage of average total interest earnings assets. Net interest margins per division are based on their contribution to the Group results.
Average yield on loans: Interest income on loans as a percentage of average loans at amortized cost based upon month-end balances.

Provision for credit losses (bps of loans): Provision for credit losses annualized as basis points of average loans gross of allowances for loan losses, based upon month-end balances.

## Footnotes

1. Definitions of certain financial measures are provided on pages 22-24 of this document
2. The reconciliation of average tangible shareholders' equity is provided on pages 15-20 of this document
3. Based on profit (loss) attributable to Deutsche Bank shareholders (post-tax)
4. The reconciliation of adjusted costs/nonoperating costs is provided on pages 15-20 of this document
5. At period-end
6. Contains Group-neutral reallocation of central liquidity reserves to business divisions
7. The tax impact is recognized in net income (loss) directly; accordingly, earnings were adjusted by $€ 498$ million, € 479 million and € 363 million before tax for the coupons paid on AT1 notes in April 2024, May 2023 and May 2022, respectively; the coupons paid on AT1 notes are not attributable to Deutsche Bank shareholders and therefore need to be deducted in the calculation in accordance with IAS 33; diluted earnings per common share include the numerator effect of assumed conversions; in case of a net loss potentially dilutive shares are not considered for the earnings per share calculation, because to do so would decrease the net loss per share
8. Includes AT1 notes, which constitute unsecured and subordinated notes of Deutsche Bank and are classified as equity in accordance with IFRS
9. Includes net interest income and net gains (losses) on financial assets/liabilities at fair value through profit or loss, net fee and commission income and remaining revenues
10. Segment assets represent consolidated view, i.e. the amounts do not include intersegment balances (except for central liquidity reserves, shorts coverage, liquidity portfolio and repack reallocations, regarding assets consumed by other segments but managed by $C B / I B$ )
11. Assets under management include assets held on behalf of customers for investment purposes and/or assets that are managed by Deutsche Bank; they are managed on a discretionary or advisory basis or are deposited with Deutsche Bank
12. Annualized management fees divided by average assets under management
13. IFRS 9 introduced a three stage approach to impairment for financial assets that are not creditimpaired at the date of origination or purchase. This approach is summarized as follows: Stage 1: The Group recognizes a credit loss allowance at an amount equal to 12-month expected credit losses
Stage 2: The Group recognizes a credit loss allowance at an amount equal to lifetime expected credit losses for those financial assets which are considered to have experienced a significant increase in credit risk since initial recognition
Stage 3: The Group recognizes a loss allowance at an amount equal to lifetime expected credit losses, reflecting a probability of default of $100 \%$, via the expected recoverable cash flows for the asset, for those financial assets that are credit-impaired; $\mathrm{POCI}=$ Purchased or Originated Credit Impaired
14. Financial assets at amortized cost consist of loans at amortized cost, cash and central bank balances, interbank balances (w/o central banks), central bank funds sold and securities purchased under resale agreements, securities borrowed and certain subcategories of other assets
15. Allowance for credit losses does not include allowance for country risk for amortized cost and off-balance sheet positions
16. Goodwill and other intangible assets attributable to the partial sale of DWS are excluded
17. FY 2022: Gain on sale of $€ 312$ million, net of transaction-related fees of $€ 6$ million
18. Twelve months period until the end of the respective reporting period compared to full year 2021
19. Pre-provision profit defined as net revenues less noninterest expenses
20. Sustainable financing and ESG investment activities are defined in the "Sustainable Finance Framework - Deutsche Bank Group" which is available at investorrelations.db.com; in cases where validation against the Framework cannot be completed before the end of the reporting quarter, volumes are disclosed upon completion of the validation in subsequent quarters
21. Operating leverage is calculated as the difference between year-on-year change in percentages of reported net revenues and year-on-year change in percentages of reported noninterest expense
22. Based on the implemented reporting logic the full year 2022 number is based on spot value as of December 31, 2022
