

Q2 2022 Fixed Income Investor Conference Call

July 29, 2022

Solid results despite challenging environment

H1 2022

Performance

- › Group revenues of € 14.0bn, reflecting average growth of 9% across four core businesses
- › Portfolio composition supports business momentum in difficult market

8%

RoTE¹

Profitability

- › Significant improvement in profitability: € 2.4bn post-tax profit, +31% YoY
- › Continued progress reducing cost/income ratio, despite unforeseen and uncontrollable items

73%

CIR

Resilience

- › Strong risk management through unprecedented macroeconomic and financial market environment
- › Robust balance sheet helps to mitigate the impact of volatile markets

13%

CET1

Note: Throughout this presentation totals may not sum due to rounding differences and percentages may not precisely reflect the absolute figures; since 2020, the Group applies fair value hedge accounting for portfolio hedges of interest rate risk to hedge account modelled deposits and fixed rate mortgages with pre-payment options under the EU carve out version of IAS 39

¹ Throughout this presentation post-tax return on average tangible shareholders' equity (RoTE) is calculated on net income after AT1 coupons; Group average tangible shareholders' equity: H1 2022: € 52.7bn, H1 2021: € 49.6bn. Group post-tax return on average shareholders' equity (RoE) H1 2022: 7.2%

Resilient loan book with strong risk management

Credit loss provision history

Loan book composition by division³

Comparative credit costs (CLP in bps of average loans)

Value-at-risk (VaR)⁴

¹ H1 2022 and Q1 2022 provisions for credit losses in bps of average loans are shown on an annualized basis

³ Q2 2022 IFRS loans: € 493bn. Detailed on slide 22

⁴ Historical simulation VaR, DB Group Trading book, 99%, 1 day. Detailed on slide 24

All core businesses demonstrating clear momentum

H1 2022¹

| | | | | | |
|------------------|---|---|------------------------|-------------|------------|
| Corporate Bank | Continued improvement in operating leverage from higher rates, business volumes and growth in fees, as well as a lower cost base | > | +18% Revenue growth | 10% RoTE | 66% CIR |
| Investment Bank | Continued FIC franchise development, with increased client engagement and return to #1 Euromoney FX ranking, as well as M&A outperformance ² | > | +9% Revenue growth | 14% RoTE | 55% CIR |
| Private Bank | Net new business growth across AuM and loans; continued optimization of distribution channels with more than 100 branches closed in H1 2022 | > | +4% Revenue growth | 9% RoTE | 75% CIR |
| Asset Management | Resilient revenue generation in a challenging market environment, combined with continued investment in growth initiatives and platform transformation | > | +6% Revenue growth | 22% RoTE | 64% CIR |

¹ RoTE and CIR as of H1 2022; revenue growth reflects percentage change of H1 2022 versus H1 2021

² Source: H1 2022 Investment Bank M&A revenues versus Dealogic Advisory fee pools

Significant improvement in pre-provision profit

Core Bank¹, in € bn, unless stated otherwise

Note: Pre-provision profit defined as net revenues (reported) less noninterest expenses (reported) before provision for credit losses (reported)

¹ Core Bank provision for credit losses: H1 2019: € 328m, H1 2020: € 1,225m, H1 2021: € 176m, H1 2022: € 532m

² 2019 figures based on reporting structure as disclosed in Annual Report 2020; 2020 figures based on reporting structure as disclosed in Annual Report 2021

Ongoing progress, despite pressures

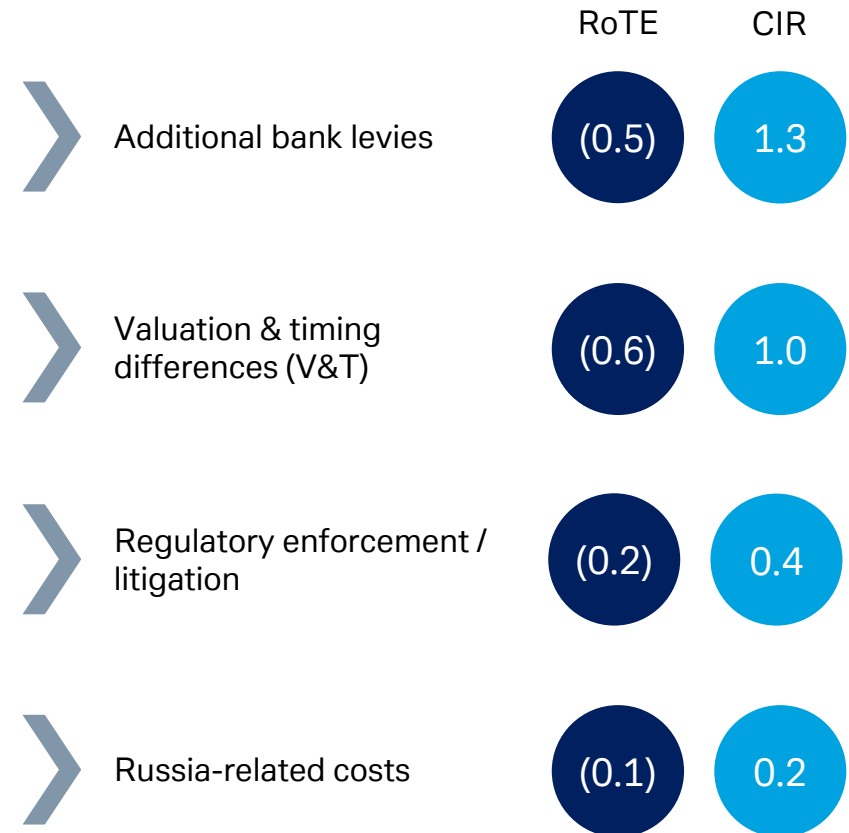

In %, unless stated otherwise

RoTE and CIR development

Ratio impacts in H1 2022

Note: Ratio impacts section includes the following for H1 2022: unplanned Single Resolution Fund (SRF) charge increase, unforeseen increase of V&T drag in C&O, unplanned regulatory enforcement and litigation costs, and costs related to relocation of tech centers

Resilient loan & deposit development

In € bn

Loan development

Comments

- Lending growth of € 8bn compared to Q1 2022 adjusted for FX and hedge accounting effects:
 - Stable growth of € 4bn in Private Bank driven by mortgages in Private Bank Germany and collateralized lending in the International Private Bank
 - Loan growth of € 2bn in FIC across all major businesses following strong demand
 - Continued growth of € 2bn in the Corporate Bank

Deposit development

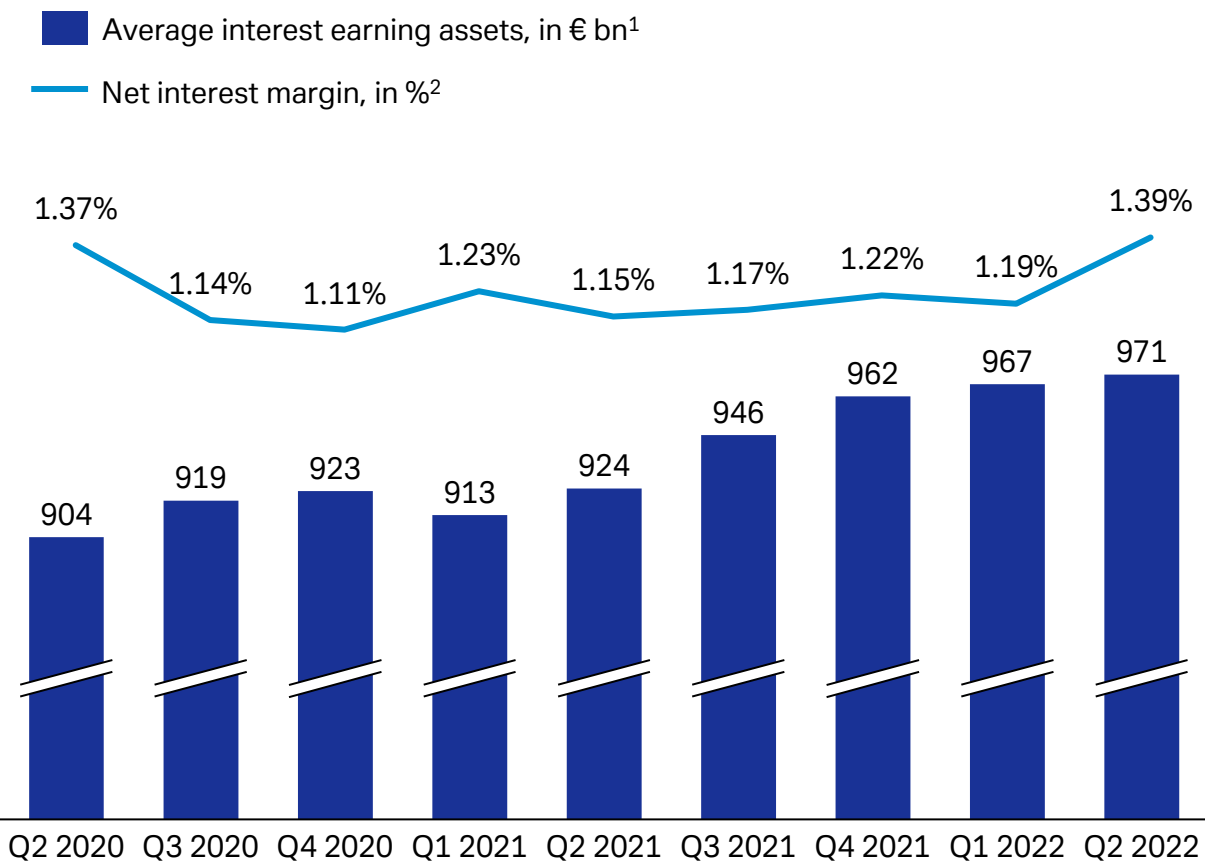

- Deposit growth of € 1bn in the quarter adjusted for FX effects, primarily driven by continued growth in Private Bank Germany
- Given current macro-outlook, continued low growth rate expected for the rest of the year

Note: Loans gross of allowances at amortized costs (IFRS 9)

Net interest margin has begun to increase

Evolution of Group NIM and average interest earning assets

Comments

- NIM increase driven predominantly by USD interest rate rises in H1 2022 as well as lower average cash balances in the second quarter
- Q2 NIM was supported by ~8bps as a result of the expiring TLTRO bonus rate and one-off effects
- Average interest earning assets increase driven by material USD strengthening as well as continued underlying loan portfolio growth, offset by lower average cash balances
- NIM expected to be supported by favorable rate environment and ongoing mortgage repricing despite TLTRO roll off and wider issuance spreads

¹ Average balances for each quarter are calculated based upon month-end balances

² Reported net interest income expressed as a percentage of average interest earning assets

NII sensitivity shows incremental revenue upside

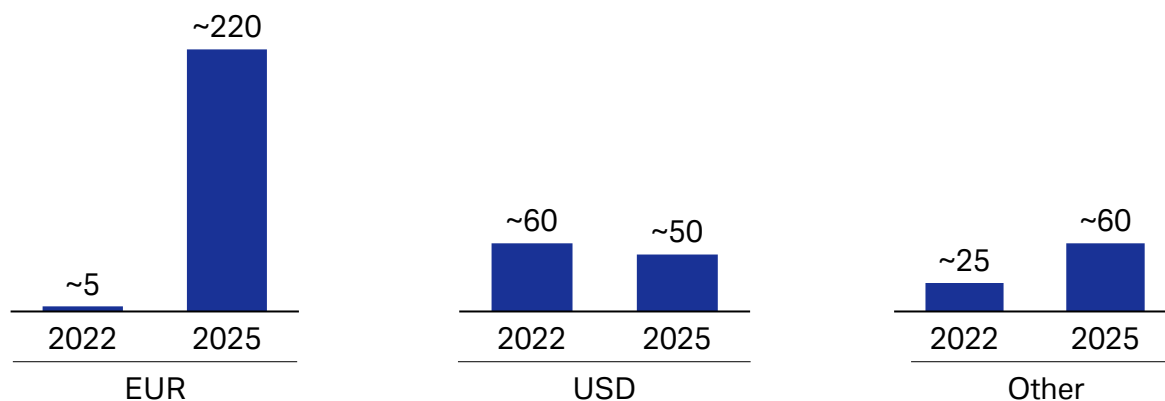

Hypothetical +/-25bps shift in yield curve, in € m

Net interest income (NII) sensitivity^{1,2}

Breakdown of sensitivity by currency for +25bps shift in yield curve²

Comments

- Revenue change grows larger over time due to cumulative effect of hedge rollovers
- Incremental NII increases decline as rates normalize
- Impact of deposit repricing as well as current behavioral assumptions already included
- Active management on deposit margins and pass through would add further upside potential from rising rates

¹ Includes impact of extended TLTRO funding

² Based on a static balance sheet per May 2022 versus current market-implied forward rates as per June 30, 2022

Strong liquidity position in line with targets

Liquidity coverage ratio¹

Net stable funding ratio²

Comments

- Liquidity remains robust and aligned with targeted levels, despite recent market volatility
- Liquidity coverage ratio and high-quality liquid assets moderately decreased during the quarter mainly driven by loan growth; this was partially offset by deposit inflows and increased issuances
- Net stable funding ratio moving towards targeted level quarter on quarter
- Diversified and stable funding benefits from:
 - Stable deposit funding
 - Longer-term capital market issuances
 - Extended utilization of low-cost TLTRO funding

¹ Liquidity coverage ratio and high-quality liquid assets based on weighted EUR amounts in line with Commission Delegated Regulation 2015/61 as amended by Regulation 2018/1620

² Preliminary Q2 2022 net stable funding ratio and available stable funding based on weighted EUR amounts in line with Regulation 575/2013 as amended by Regulation 2019/876

CET1 ratio increase driven by earnings

Period end

CET1 ratio, movements in basis points

Risk-weighted assets, in € bn

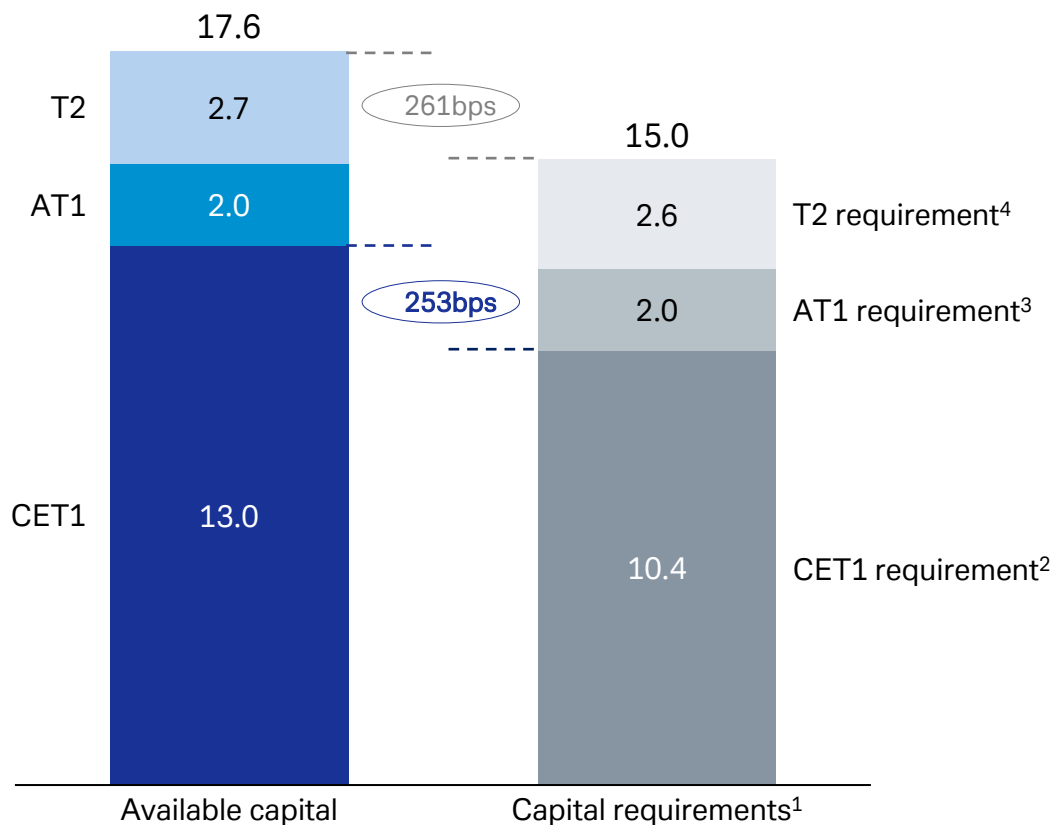

Comments

- CET1 ratio up 14bps compared to Q1 2022:
 - (3)bps from FX translation effects
 - 13bps from capital changes reflecting strong Q2 2022 earnings net of deductions for dividends and AT1 coupons, and OCI losses
 - 4bps from RWA changes as the decrease in credit risk and operational risk RWA was only partly offset by higher market risk RWA
- RWA higher by € 7bn from FX impact as compared to Q1 2022, with otherwise broadly offsetting effects between credit, market and operational risk:
 - € (5)bn decrease in credit risk RWA primarily driven by tight credit risk management
 - € 4bn increase in market risk principally from increase in the quantitative VaR / SVaR multiplier
 - € (1)bn lower operational risk RWA as improvement of internal loss profile continues

¹ Including credit valuation adjustment (CVA) RWA

Capital ratios well above regulatory requirements

In %, unless stated otherwise, as of June 30, 2022

Comments

- Buffer to CET1 capital ratio requirement increased by 14bps to 253bps over the quarter, reflecting higher CET1 capital from Q2 2022 earnings
- € 0.75bn AT1 issued on March 28 settled on April 4 now included in statutory Q2 2022 capital
- Available AT1 and T2 capital at or above respective requirements
- Distance to regulatory requirements of € 9bn

¹ Maximum distributable amount (MDA)

² CET1 requirement includes Pillar 1 requirement (4.50%), Pillar 2 requirement (1.41%), capital conservation buffer (2.50%), G/D-SIB buffer (2.00%), countercyclical capital buffer (0.02%)

³ T1 requirement includes higher Pillar 1 requirement (6.00%) and Pillar 2 requirement (1.88%) compared to footnote 2 on this page

⁴ Total capital requirement includes higher Pillar 1 requirement (8.00%) and Pillar 2 requirement (2.50%) compared to footnotes 2 and 3 on this page

Leverage ratio unchanged on a like-for-like basis

In € bn, except movements (in bps), period end

| | | | | | |
|-------------------|--------------------|-----|---|-----|-------|
| Tier 1 capital | 53.2 | 0.8 | - | 1.2 | 55.2 |
| Leverage exposure | 1,247 ¹ | 26 | 7 | - | 1,280 |

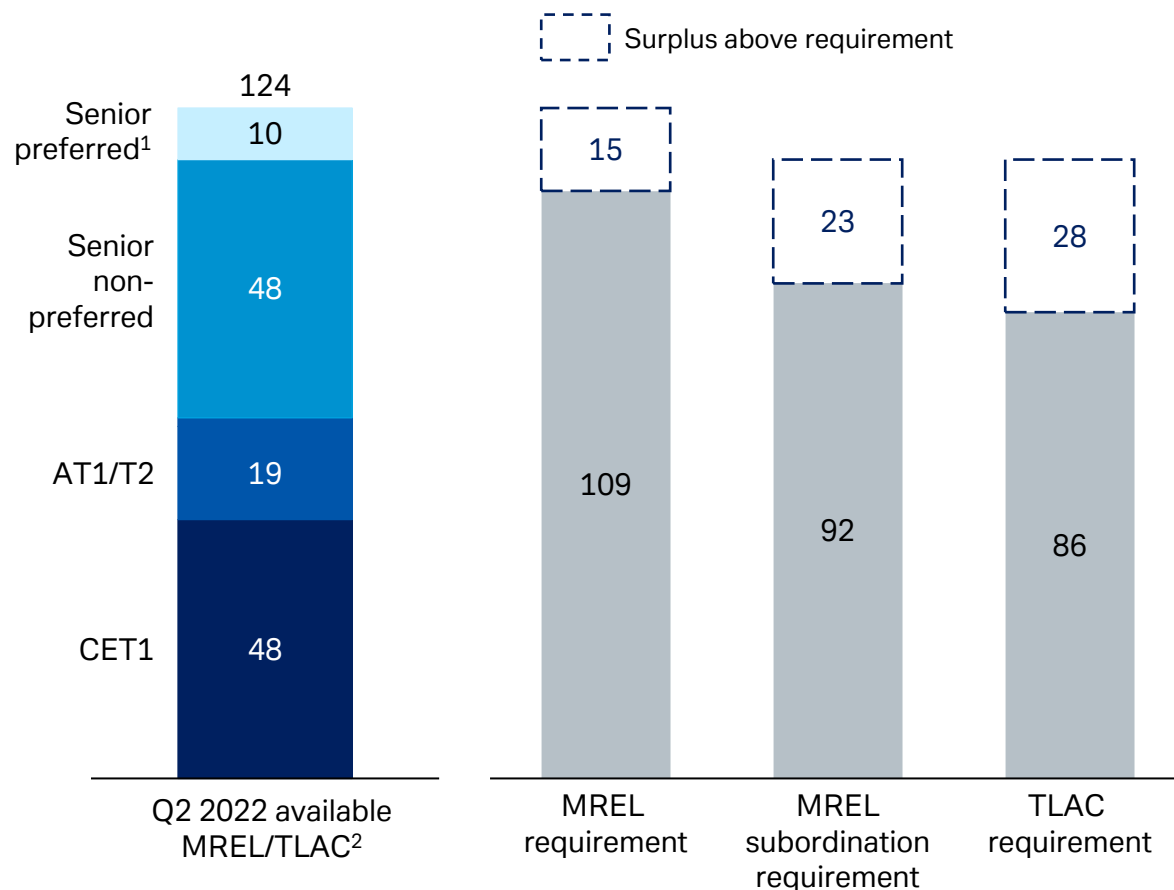

Comments

- On April 1, 2022, the exclusion of certain central bank balances from the leverage exposure was discontinued
- Including ECB cash, the leverage ratio increased 5bps in the quarter:
 - (3)bps from FX translation effects
 - (2)bps from leverage exposure mainly driven by increase in business activities, including Core Bank loan growth
 - 10bps Tier 1 capital change, mainly due to Q2 earnings and the recognition of our March 28 AT1 issuance settled in early April

¹ Q1 2022 reported leverage ratio was at 4.6% due to the exclusion of certain central bank balances after the ECB decision June 18, 2021, amounting to € (83.3)bn; this temporary exclusion discontinued on April 1, 2022

Significant buffer over MREL/TLAC requirements

Loss-absorbing capacity, in € bn, as of June 30, 2022

Comments

- Q2 2022 loss-absorbing capacity significantly above all regulatory requirements, with MREL remaining most binding constraint
- € 15bn MREL surplus stable quarter on quarter
 - ~€ 3bn increase from new issuances
 - ~€ (3)bn impact from higher MREL requirement
- H2 2022 MREL surplus expected to remain at comfortable level including tender offer announced on July 28, 2022

¹ Plain vanilla instruments and structured notes eligible for MREL

² Includes adjustments to regulatory Tier 2 capital; available TLAC/subordinated MREL does not include senior preferred debt

Substantial portion of issuance plan already achieved in H1

In € bn, unless stated otherwise

■ Covered bonds
 ■ Senior structured/preferred
 ■ Senior non-preferred
 ■ AT1/T2

- 2022 issuance plan remains at € 15-20bn
- Q2 highlight: € 1bn 15-year Pfandbrief
- \$ 1.3bn senior non-preferred issued in July, taking year-to-date total to € 14bn²
- Tender announced on July 28 for up to \$ 1bn senior non-preferred

¹ Historical redemptions include non-contractual outflows (e.g. calls, knock-outs, buybacks) whereas (future) contractual maturities do not; contractual maturities for 2020 and 2021 were € 17bn and € 20bn respectively

² As of July 22, 2022

- Managing through continued uncertain macro-economic and financial market environment
- Strong Core Bank operating performance together with benefits from higher rate environment
- Continue to focus on delivery of 2022 targets, despite updated CIR guidance
- Focus will remain on managing a resilient balance sheet; retaining CLP outlook of 25bps
- Funding plan execution well advanced, providing a cushion against higher funding costs

Appendix

Q2 2022 Group financial highlights

In € m, unless stated otherwise

| | | Q2 2022 | Change in % vs. Q2 2021 | Change in % vs. Q1 2022 |
|-------------------|--|---------|----------------------------|----------------------------|
| Revenues | Revenues | 6,650 | 7 | (9) |
| | Revenues ex specific items ¹ | 6,639 | 7 | (9) |
| Costs | Noninterest expenses | 4,870 | (3) | (9) |
| | Adjusted costs | 4,767 | 1 | (11) |
| Profitability | Profit (loss) before tax | 1,547 | 33 | (7) |
| | Profit (loss) | 1,211 | 46 | (1) |
| | RoTE (in %) ² | 7.9 | 2.4 ppt | (0.2) ppt |
| | Cost/income ratio (in %) | 73.2 | (6.9) ppt | (0.2) ppt |
| Risk and Capital | Provision for credit losses (in bps of average loans) ³ | 19 | 12 bps | (5) bps |
| | CET1 ratio (in %) | 13.0 | (23) bps | 14 bps |
| | Leverage ratio (in %) ^{4,5} | 4.3 | 1 bps | 5 bps |
| Per share metrics | Diluted earnings per share (in €) | 0.33 | 64 | (40) |
| | Tangible book value per share (in €) | 25.68 | 7 | 2 |

¹ Detailed on slide 35

² Average tangible shareholders' equity Q2 2022: € 52.9bn, Q2 2021: € 49.9bn and Q1 2022: € 52.4bn; Group RoE Q2 2022: 7.1%

³ Provision for credit losses annualized as basis points of average loans gross of allowances for loan losses (€ 486bn for Q2 2022)

⁴ Throughout this presentation and starting with Q1 2022, leverage ratio is presented as reported, as the fully loaded definition has been discontinued due to immaterial differences; comparative information for earlier periods is unchanged and based on DB's earlier fully loaded definition

⁵ Q2 2021 and Q1 2022 pro-forma leverage exposures include certain central bank balances, here included for like for like comparison purposes, detailed on slides 16 and 46; Q2 2021 and Q1 2022 reported leverage ratios excluding these balances amount to 4.7% and 4.6% respectively

Conservatively managed balance sheet

In € bn, net¹, as of June 30, 2022

Comments

- Resilient balance sheet
- Liquidity reserves account for 24% of net balance sheet
- Conservative loan-to-deposit ratio provides room for further growth
- Highly diversified and stable funding profile with ~60% of net balance sheet funded via deposits

¹ Net balance sheet of € 1,038bn is defined as IFRS balance sheet (€ 1,387bn) adjusted to reflect the funding required after recognizing legal netting agreements (€ 251bn), cash collateral received (€ 42bn) and paid (€ 30bn), and offsetting pending settlement balances (€ 25bn)

² Liquidity reserves comprise of total stock of high-quality liquid assets (HQLA), including assets subject to transfer restrictions and other central bank eligible securities

³ Trading and related assets along with similar liabilities, includes debt and equity securities (excluding highly liquid securities), derivatives, repos, securities borrowed and lent, brokerage receivables and payables, and loans measured at fair value

⁴ Loans at amortized cost, gross of allowances

⁵ Other assets include goodwill and other intangible, property and equipment, tax assets, cash and equivalents which are not part of liquidity reserve and other receivables; other liabilities include accrued expenses, investment contract liabilities, financial liabilities designated at fair value through P&L excluding those included in trading and related assets

Current ratings

As of July 28, 2022

| | | | Moody's Investors Services | S&P Global Ratings | Fitch Ratings | DBRS |
|---|-----------|------------------------|----------------------------|--------------------|---------------|------------|
| Counterparty obligations (e.g. deposits / structured notes / derivatives / swaps / trade finance obligations) | | | A2 | A ⁻¹ | A- | A (high) |
| Senior unsecured | Long-term | Preferred ² | A2 | A- | A- | A (low) |
| | | Non-preferred | Baa2 | BBB- | BBB+ | BBB (high) |
| Tier 2 | | | Ba1 | BB+ | BBB- | - |
| Additional Tier 1 | | | Ba3 | BB- | BB | - |
| Short-term | | | P-1 | A-2 | F2 | R-1 (low) |
| Outlook | | | Positive | Stable | Positive | Positive |

¹ The Issuer Credit Rating (ICR) is S&P's view on an obligor's overall creditworthiness; it does not apply to any specific financial obligation, as it does not take into account the nature of and provisions of the obligation, its standing in bankruptcy or liquidation, statutory preferences, or the legality and enforceability of the obligation

² Defined as senior unsecured debt rating at Moody's and S&P, as preferred senior debt rating at Fitch and as senior debt at DBRS

Additional Tier 1 instruments outstanding

Note: Additional information is available on the Deutsche Bank Investor Relations website (creditor information section)

Additional funding disclosure

Q2 2022, capital markets issuance outstanding, in € bn

By product

By currency

Loan book composition

Q2 2022, IFRS loans: € 493bn

Comments

- Well diversified loan portfolio
- YTD increase from FX impact on loan book is € 11bn
- 53% of loan portfolio in Private Bank, mainly consisting of retail mortgages in Private Bank Germany and collateralized lending (Wealth Management) in International Private Bank
- 26% of loan portfolio in Corporate Bank (trade finance, lending and overdrafts), predominantly in Corporate Treasury Services for multinational corporations (MNC) and mid corps, followed by Business Banking (SME clients in Germany)
- 20% of loan portfolio in Investment Bank; comprises of well-secured, mainly asset backed loans, commercial real estate loans and collateralized financing
- Well-positioned to withstand downside risks due to conservative underwriting standards and risk appetite frameworks limiting concentration risk

Note: Loan amounts are gross of allowances for loans

¹ Mainly includes Corporate & Other, Institutional Client Services in the Corporate Bank and Capital Release Unit

² Other businesses with exposure less than 2% each, including APAC Commercial Real Estate

³ Includes Strategic Corporate Lending and recourse and non-recourse Commercial Real Estate business

Provision for credit losses

In € m

Comments

- Quarter-on-quarter reduction driven by lower level of new provisions on Russian portfolio and the benefits of a portfolio sale in Private Bank
- Second order effects from Ukraine war, supply chain challenges and rising inflation have been muted
- Stage 3 provisions overall contained and within normalized range
- Stage 1+2 provisions predominantly driven by further deterioration of macroeconomic forecasts, partly compensated by otherwise improved portfolio parameters
- To reflect macroeconomic uncertainties, overlay applied consistently as in previous quarter

Value-at-Risk / stressed Value-at-Risk (VaR / sVaR)

In € m, unless stated otherwise

Historical simulation VaR, DB Group Trading book, 99%, 1 day

Historical simulation sVaR, DB Group Regulatory scope, 99%, 10 days

Deposit repricing in Q2 2022

In € bn, unless otherwise stated

Quarterly charging revenues, in € m

Comments

- Further increase in quarterly revenues by 10% driven by Corporate Bank and Private Bank
- Q2 2022 annualized run-rate of € 612m, up € 204m compared to FY 2021 revenues
- Revenues from negative interest rates will cease on the back of the recent ECB decision from August 2022

Charging agreements¹

- Given the interest rate outlook implementation of new charging agreements will be discontinued
- Future application of charges will be subject to ECB policy decisions, while agreements provide effective NII protection

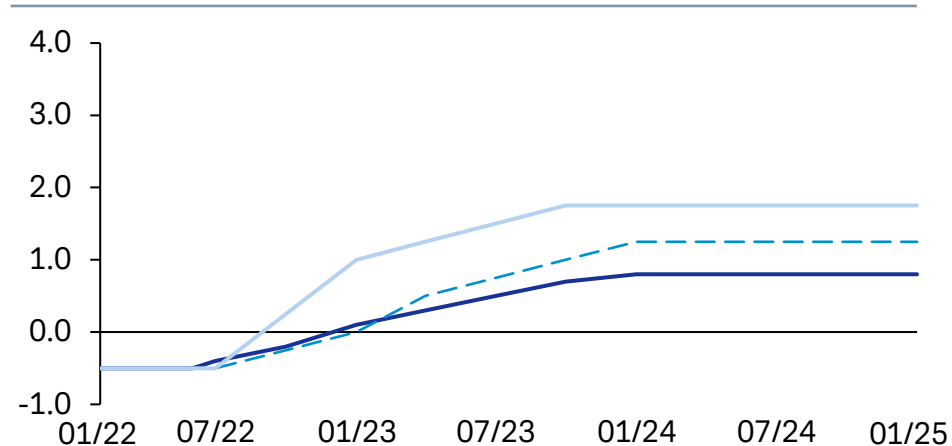

¹ Total EUR current account balances of Corporate Bank and Private Bank deposits with implemented charging agreements; individual charging thresholds apply

Evolution of market implied interest rates

In %

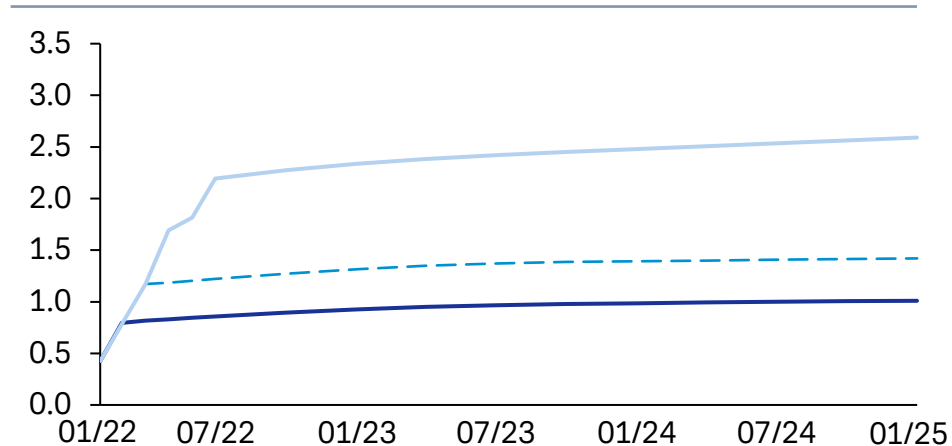

ECB deposit facility rate

Federal Reserve interest on reserve balances

EUR 10-year swap rate

USD 10-year swap rate

— February 11, 2022 market implied – per March 2022 Investor Deep Dive — March 31, 2022 market implied — June 30, 2022 market implied

TLTRO take-up and maturities

In € bn

- TLTRO outstanding at end of period
- TLTRO contractual maturity in period

Leverage exposure and risk weighted assets

CRD4, in € bn, period end

Leverage exposure

Risk weighted assets

¹ Excludes any derivatives related market risk RWA, which have been fully allocated to non-derivatives trading assets

² Includes contingent liabilities

³ Q1 2022 pro-forma leverage exposure includes certain central bank balances, here included for like for like comparison purposes

Litigation update

In € bn, period end

Litigation provisions¹

Contingent liabilities¹

Comments

- Provisions increased modestly by € 0.1bn quarter on quarter
- Contingent liabilities increased modestly by € 0.1bn quarter on quarter; contingent liabilities include possible obligations where an estimate can be made and outflow is more than remote, but less than probable

Note: Figures reflect current status of individual matters and provisions. Litigation provisions and contingent liabilities are subject to potential further developments

¹ Includes civil litigation and regulatory enforcement matters

Sustainability at Deutsche Bank

Q2 2022 highlights

Our key focus areas

Recent achievements

Sustainable Finance

- Increase of cumulative volumes in sustainable financing and investment to € 191bn¹, with growth in all businesses
- Deal highlights: 1st green bond issuance by Austrian government due in May 2049; supply chain financing linked to ESG ratings for Henkel AG & Co. KGaA ; advisory of BASF on a complex M&A and project financing transaction for the acquisition and construction of the world's largest offshore wind farm, Hollandse Kust Zuid

Policies & Commitments

- Joined the EP100 initiative, committing to net zero operational carbon at owned occupied assets globally by 2030
- Joined the RE100 initiative under The Climate Group, committing to 100% of renewable energy used for own operations until 2025
- Signed up to the World Green Building Council's Net Zero Carbon Buildings Commitment, pledging to reduce and compensate operational emissions associated with energy used to light, heat, cool and power buildings, for assets with direct control

People & Own Operations

- Launched bank-wide initiative Plastic Free July aiming to reduce single-use plastics
- Deutsche Bank employees partnered with Ashoka to run a series of environmental change-making camps for young people from marginalized communities in the Philippines

Thought Leadership & Stakeholder Engagement

- Joined the German Ocean Decade committee as an official network partner to strengthen the 10 UN ocean challenges (Decade of Ocean Science for Sustainable Development)
- Deutsche Bank Stiftung supported the charity organization CARE with € 250,000 to provide Ukrainian refugee children with school supplies

| CDP | <ul style="list-style-type: none"> Criteria related to climate change topics | A to D- | B | Stable total CDP Score of B |
| ESG Index Listings | Dow Jones Sustainability Index Europe, FTSE4Good Index (World, Eurozone), MSCI Sustainability Index | | | |

¹ In April 2022, DB's score increased from 27.4 to 29 points (Medium Risk), because Sustainalytics increased the general ESG risk exposure for the financial sector due the war in Ukraine

² In May 2022, DB's S&P score decreased from 60 to 58, because the DWS allegations negatively influence our score

Simplified legal entity structure

- This chart shows a selection of DB’s material operating entities that, together with DB’s global branch network, account for 90% of the Group’s consolidated revenues
- Deutsche Bank AG has established branch presences across Germany and in international locations such as inter alia New York, London, Singapore and Hong Kong
- As the Group’s parent entity, Deutsche Bank AG is the direct or indirect holding company for the Group’s subsidiaries

Definition of adjustments

| | |
|---------------------------------------|--|
| Revenues excluding specific items | Revenues excluding specific items are calculated by adjusting net revenues under IFRS for specific revenue items which generally fall outside the usual nature or scope of the business and are likely to distort an accurate assessment of the divisional operating performance. Excluded items are Debt Valuation Adjustment (DVA) and material transactions or events that are either one-off in nature or belong to a portfolio of connected transactions or events where the P&L impact is limited to a specific period of time as shown on slides 35 and 36 |
| Revenues on a currency adjusted basis | Revenues on a currency-adjusted basis is calculated by translating prior-period revenues that were generated in non-euro currencies into euros at the foreign exchange rates that prevailed during the current year period. These adjusted figures, and period-to-period percentage changes based thereon, are intended to provide information on the development of underlying business volumes |
| Adjusted costs | Adjusted costs are calculated by deducting (i) impairment of goodwill and other intangible assets, (ii) net litigation charges and (iii) restructuring and severance (in total referred to as nonoperating costs) from noninterest expenses under IFRS as shown on slides 35 and 36 |
| Transformation charges | Transformation charges are costs, included in adjusted costs, that are directly related to Deutsche Bank's transformation as a result of the strategy announced on 7 July 2019 and certain costs related to incremental or accelerated decisions driven by the changes in our expected operations due to the COVID-19 pandemic. Such charges include the transformation-related impairment of software and real estate, the accelerated software amortization and other transformation charges like onerous contract provisions or legal and consulting fees related to the strategy execution |
| Transformation-related effects | Transformation-related effects are financial impacts, in addition to transformation charges (as defined above), which are recorded outside of adjusted costs. These include goodwill impairments in the second quarter 2019, as well as restructuring and severance expenses from the third quarter 2019 onwards. In addition to the aforementioned pre-tax items, transformation-related effects on a post-tax basis include pro-forma tax effects on the aforementioned items and deferred tax asset valuation adjustments in connection with the transformation of the Group |
| Operating leverage | Operating leverage is calculated as the difference between year-on-year change in percentages of reported net revenues and year-on-year change in percentages of reported noninterest expenses |

Cautionary statements

Forward-looking statements

This presentation contains forward-looking statements. Forward-looking statements are statements that are not historical facts; they include statements about our beliefs and expectations and the assumptions underlying them. These statements are based on plans, estimates and projections as they are currently available to the management of Deutsche Bank. Forward-looking statements therefore speak only as of the date they are made, and we undertake no obligation to update publicly any of them in light of new information or future events.

By their very nature, forward-looking statements involve risks and uncertainties. A number of important factors could therefore cause actual results to differ materially from those contained in any forward-looking statement. Such factors include the conditions in the financial markets in Germany, in Europe, in the United States and elsewhere from which we derive a substantial portion of our revenues and in which we hold a substantial portion of our assets, the development of asset prices and market volatility, potential defaults of borrowers or trading counterparties, the implementation of our strategic initiatives, the reliability of our risk management policies, procedures and methods, and other risks referenced in our filings with the U.S. Securities and Exchange Commission. Such factors are described in detail in our SEC Form 20-F of 11 March 2022 under the heading “Risk Factors.” Copies of this document are readily available upon request or can be downloaded from investor-relations.db.com.

Non-IFRS financial measures

This presentation also contains non-IFRS financial measures. For a reconciliation to directly comparable figures reported under IFRS, to the extent such reconciliation is not provided in this presentation, refer to the Q2 2022 Financial Data Supplement, which is accompanying this presentation and available at investor-relations.db.com.

EU carve out

Results are prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (“IASB”) and endorsed by the European Union (“EU”), including, from 2020, application of portfolio fair value hedge accounting for non-maturing deposits and fixed rate mortgages with pre-payment options (the “EU carve-out”). Fair value hedge accounting under the EU carve-out is employed to minimize the accounting exposure to both positive and negative moves in interest rates in each tenor bucket thereby reducing the volatility of reported revenue from Treasury activities. For the three-month period ended June 30, 2022, application of the EU carve-out had a negative impact of € 1,049 million on profit before taxes and of € 823 million on profit. For the same time period in 2021, the application of the EU carve-out had a negative impact of € 5 million on profit before taxes and of € 9 million on profit. For the six-month period ended June 30, 2022, application of the EU carve-out had a negative impact of € 910 million on profit before taxes and of € 717 million on profit. For the same time period in 2021 the application of the EU carve-out had a negative impact of € 321 million on profit before taxes and of € 216 million on profit. The Group’s regulatory capital and ratios thereof are also reported on the basis EU carve-out version of IAS 39. For the six-month period ended June 30, 2022, application of the EU carve-out had a negative impact on the CET1 capital ratio of about 19 basis points and a negative impact of about 6 basis point for the same time period in 2021. In any given period, the net effect of the EU carve-out can be positive or negative, depending on the fair market value changes in the positions being hedged and the hedging instruments.

ESG Classification

We defined our sustainable financing and investment activities in the “Sustainable Financing Framework – Deutsche Bank Group” which is available at investor-relations.db.com. Given the cumulative definition of our target, in cases where validation against the Framework cannot be completed before the end of the reporting quarter, volumes are disclosed upon completion of the validation in subsequent quarters.

In Asset Management DWS introduced its ESG Product Classification Framework (“ESG Framework”) in 2021 taking into account relevant legislation (including Regulation (EU) 2019/2088 – SFDR), market standards and internal developments. The ESG Framework is further described in the Annual report 2021 of DWS under the heading “Our Product Suite – Key Highlights / ESG Product Classification Framework” which is available at group.dws.com/ir/reports-and-events/annual-report/. There is no change in the ESG Framework in Q2 2022. DWS will continue to develop and refine its ESG Framework in accordance with evolving regulation and market practice.
